

EMERGENCY PREPAREDNESS AND RESPONSE PLAN

BANGA BUILDING MATERIAL LIMITED

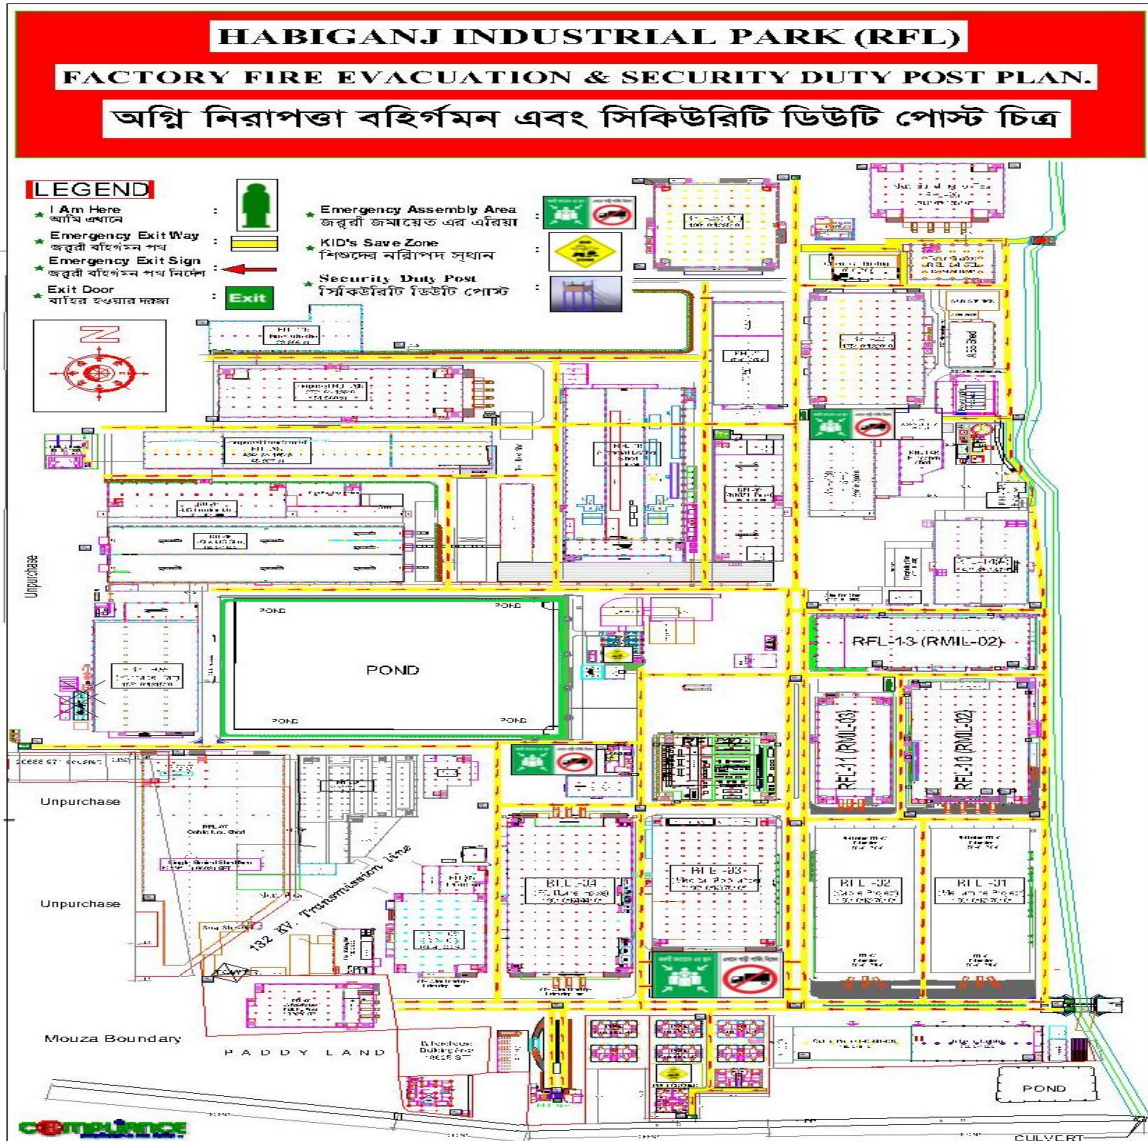

1.0 Introduction:

An emergency Response Plan (ERP) is a detailed step-by-step procedure that needs to be followed in emergency situations. An emergency response plan also includes information such as whom to notify, who should do what, and location of emergency facilities and equipment. The Emergency Response Plan includes any measures that should be in place at all the BBML facilities to combat an accident resulting from fire, explosion or due to any natural calamities (e.g. Earthquake, cyclones, and flood).

1.1 Factory General information:

Banga Building Material Ltd (BBML) is located at the Habigonj Industrial Park which produced the Electrical Fans, Bulbs, PVC switches, PVC sockets, PVC doors, PVC sheets, PVC Ceiling, PVC window profiles, PVC Frames, Bathroom fittings, Stationery items, Recycled products, Melamine items, OPAL items. BBML is one of the sister concerns of RFL group. Approximate manpower of BBML is around 3700. It comprises building named RFL- 05, 15, ABS building where bathroom fittings, B-23 is switch socket and bulb is manufacturing, Building- 18, 19, 21 & B-22 where PVC door, frame, window profile, sheet, soft PVC are manufacturing Building-04 fan is producing, Building-03, 12 are producing stationary product, B-14A, 14B, 24 are producing recycle product. B-20, 26 and Opal project are under construction.

1.2 Layout of factory:

2.0 Purpose

This Emergency Response Plan has been developed to provide an organizational and procedural framework for the management of emergency scenarios for BBML facilities at the HIP. The purpose of an ERP is to facilitate and organize employer and employee actions during workplace emergencies. This plan also complies with the legal requirement of the local authority and aligns with World Bank Group General Environmental, Health and Safety Guidelines.

An emergency plan specifies aims and procedures for handling sudden or unexpected situations. Following are the broad objectives of this plan.

- To identify the various types of natural, manmade and technological emergencies that may impact on BBML Project/sites/facilities;
- To propose necessary action plans for minimizing the worst consequences;
- To enable the conduct of safe operations to preserve life and properties;
- To build awareness among employees to prevent fatalities and injuries;
- To identify proper actions and communication during the period of the emergency;
- To identify the duty of management to take emergency action in as short a time as is practicable;
- To mitigate damage to buildings, stock and equipment and accelerate the resumption of normal operations; and
- To identify the means available to mitigate or prevent emergency situations;

3.0 Scope

This procedure is applicable for the BBML facility at HIP.

4.0 Roles and Responsibility:

BBML Executive Director (ED): He will be responsible for approving the Emergency Preparedness and response plan.

General Manager (Factory Head): He will be act as an incident controller when emergency situation occur. He will be the authority to declare a state of emergency.

Assistant General Manager Production (BBML): The Deputy General Manager production shall report to the Manager in matters related to emergency preparedness and response. In the absence of the GM, he will be responsible for declaring the state of emergency.

Senior Manager Production (BBML): The Manager production shall report to the Senior Manager in matters related to emergency preparedness and response. In the absence of the GM, he will be responsible for declaring the state of emergency.

Manager Maintenance (BBML): He will be responsible for implementing the plan during emergency in co-ordination with EHS officer/Manager, Assistant General Manager Production, GM, Fire safety Officer, Security In-charge.

EHS Officer/Manager: He will be responsible for-

- Ensure that everyone is aware of their responsibilities as defined in this procedure;
- Monitoring that required equipment for emergency is present in all designated areas;
- Collect and record information as like training record, mock drill record, near miss record, Incident investigation record etc. on the performance indicators identified as part of this procedure.
- Regularly schedule and deliver training to employee on all emergency response procedures; and
- Analyze the results of drills (e.g. evacuation time) and take appropriate action.

Fire Safety Officer: He will responsible for-

- Guiding emergency team for execution of the appropriate measure relating to fire, earthquake and any kind of natural disaster;
- Regularly schedule and organize evacuation drills in all work areas;
- Regularly schedule and deliver training to fire fighter; and
- Inspect all firefighting equipment and other rescue items;

Emergency Team: When emergency incidents occur, the Emergency Team is responsible for the execution of the appropriate emergency procedures as advised by the EMR and/or Function / Departmental Manager.

Assistant General Manager (Production- BBML): He will be responsible for helping BBML with all type of logistic support like as rescue, firefighting etc. When emergency occurs.

Factory in charge (BBML): He will be responsible for helping BBML with fire marshal, firefighting equipment and any kind of logistic support when emergency occurs.

Security In-charge: He will be responsible for guide people to assembly area, mob control, clear the road and walkway etc. during emergency period and also guided necessary vehicle such as ambulance, foam truck, water truck etc.

First Aid Team: The member of the first aid team is fully dedicated to handle any type of personal injury / accident.

Fig: Emergency response team for BBML-HIP operational site

5.0 Potential emergencies

Potential emergency situations that the BBML construction facilities may be affected by including:

- Fire & Explosion;
- Release/ spills of chemicals and toxic substances;
- Terrorist activities-bomb threat;
- Crash or collision;
- Flood;
- Earthquakes; and
- Severe weather (such as Cyclone, Lightning & thunderstorms etc.).

6.0 Management Measure

6.1. EMERGENCY COMMUNICATION

It is essential to communicate (both internally within the site and externally to the emergency service providers) about emergency situation in a timely manner. The following paragraph describes the emergency communication mechanism.

- The person who identifies the (potential) emergency situation will inform the Senior Manager/Deputy Manager/ EHS manager/ GM Admin (incident controller) immediately;
- The Incident Controller, in conjunction with the Senior Manager, EHS officer/Manager will decide whether or not to declare the emergency in accordance with the emergency response categories detailed at annexure-01;
- The Incident Controller (GM Admin) will declare the state of emergency through either siren or Public Address (PA)system placed in the control room;
- Please refer annexure-02 for Emergency communication;

- After declaring the emergency, the Senior Manager will act in conjunction with the Fire Safety Officer (FSO), Emergency Response team, Security in-charge, EHS manager in accordance with this Plan;
- All necessary information on the emergency response plan (such as emergency contact numbers, location of assembly area, Do's and Don't during emergency *etc.*) shall be notified to BBML employees via notice board and through tool box talks; and
- Report of an emergency scenario (that the site has come across) shall be prepared and circulated within BBML site. Typically, the report shall contain the nature and scale of emergency, what was the response time, the challenges faced to combat the emergency, damages caused by the emergency, lessons learnt etc.

6.2. EVACUATION PROCEDURES

Evacuation plays an important role in responding to an emergency situation. It is to be noted that evacuation is not absolutely necessary for all types of emergencies. However, knowing the emergency evacuation procedure is absolute necessary as emergencies occur without any prior warning. The site management must take adequate measures to communicate the evacuation procedure to every person entering the premises. Adequate signage, display/ marking, provisional educate emergency light of the emergency evacuation route must be put in place. Emergency evacuation route must always be kept free from any kind of obstruction. The emergency evacuation route shall be designed in such a manner that it takes the workmen to the nearest emergency exit connected with the emergency assembly area. The following points attempts to describe the procedures to be adhered to during an emergency evacuation.

Upon hearing the alarm or when directed by a Person -

- Shall prepare to evacuate and do not panic
- Get your workplace ready to be left unattended. Shut down all machines; turn off gas and electrical equipment, if safe to do so.
- Close the doors as you go – do not lock them. (Point to be noted that: In the case of a bomb threat, leave the doors open).

- Assist any person in immediate danger, such as Pregnant, handicapped, partially handicapped, injured etc;
- Leave the building via the nearest safe route.
- Obey all directions from Shift in charge/Rescue team.
- Move calmly to the assembly point or other advised area and stay there until the All Clear has been given.
- Follow closely the instructions of emergency services personnel and Shift in charge/Rescue team.
- Wait for the green signal to re-enter the building.

Specific instruction Summary:

Steps to Safety in incident:

- Call to the Control room or Emergency Response Team.
- Isolate the area by shutting doors when exiting.
- Use stairs; never take the elevator during a fire.
- Never attempt to re-enter the building unless cleared to do so by the Fire Department.
- If able, assist people with special needs.

If Caught in Smoke:

- Drop to hands and knees and crawl towards the nearest exit.
- Stay low, smoke will rise to ceiling level first.
- Hold your breath as much as possible; breathe through your nose and use a filter such as a shirt, towel or handkerchief.

If Trapped in a Room for Smoke:

- Close as many doors as possible between you and the fire.
- Wet and place cloth material around or under the door to help prevent smoke from entering the room.
- If the room has an outside window, be prepared to signal to someone outside.

Clothing on Fire (Stop, Drop and Roll):

- Direct or assist a person to roll around on the floor to smother the flames.
- Only drench with water if immediately available.
- Obtain medical attention. Call Control Room.
- Report incident to Senior Authority.

6.3 Activities during emergency:

- Do not Panic, Stay Calm;
- Stop work immediately and vacate the workplace;
- Shut down the electrical connection in case of any Fire incident, Electrical short circuit, earthquake or any other emergency scenario that the emergency control team (based on their experience and knowledge) may feel requires shutting down connections. However, these decisions would only be taken at the time of emergency based on the need of the scenario.
- All employees will go to the designated emergency Assembly Point located & mark in the specific area for BBML;
- Designated person shall notify the Bangladesh fire service and civil defense and important person by phone;
- Once Bangladesh fire service and civil defense (in case it is felt necessary to inform the emergency service provider) has been notified and it is safe to do so, internal trained Emergency response team may attempt to handle the situation. All incident needs to be reported to the senior authority;
- When the incident location has been evacuated a head count shall be completed by the designated person accounting for all employees on place including those who may be trying to handle the situation and assist the emergency response team;
- A List of personnel on site, updated and current, will be kept in the Personnel office;
- The Emergency Response Team is responsible for ensuring that the requirements of fire department or other emergency services are met and will provide all pertinent information to them; and
- The facility will provide first aid attendants and medical equipment suitable for treating injuries sustained during any incident.

6.4 Response measures for various types of Emergencies: -

6.4.1 FLOOD

- Evacuate (follow evacuation procedure as mentioned above) the people from flooded area and send them to a safe area.
- Switch of the power supply from effected area.
- Remove all types of obstructions from the drainage system.
- Coordinate with the Emergency Response Team and take action as per their guideline.
- In cases of any accident or threat to human life please call first aid team and get medical attention as soon as possible.
- Call local fire brigade through communication system in case of an out-of-control situation.
- In case of excessive flood, sand bag, concrete blocks shall be placed on the edge of the factory land to protect erosion of soil. Another measure of placing polythene sheets over the sand surface can be taken to minimize the loss of sand with every strong wave.

6.4.2 CYCLONE

- Switch off the Power Supply of Sub-station.
- Close all the in & out doors where possible wind enters.
- Open windows, exhaust at the top of the walls if present and allow the wind go from top which enters into the plant shades.
- Instruct all the associates including workmen not to allow them to go outside till the wind & cyclone effect reduces to the normal level
- After the cyclone, inform to Emergency Response Team to investigate the property loss in the plant for further action.

6.4.3 Earthquake

- Isolate electrical supply where ever it is possible.
- Do not use elevators.
- All personnel must go to safe place located at a safe distance from the buildings;
- Ensure fire and siren alarm system in all floors. During earthquake all the personnel will come down in safe place in a row through stair after hearing the alarm.

- Rescue Team will help the injured employees or who is trapped inside the building. And they will also take the injured employees in a safe place.
- Isolate all pipelines of steam, compressed air, fuel and CO₂ when they are not in use.
- Check availability of security personnel and discuss immediate action to be taken.
- Empty tanks which are installed in vertical and relatively unstable conditions.
- Review material storage and ensure that maximum of such material is removed from places from where it may fall from height. Uniform Material distribution at a lowest height from floor is the safest way of storage.
- Ensure that all compressed gas cylinders are removed from manufacturing areas and stored in a designated location in safest manner.
- Ensure caps on all compressed gas cylinders.
- Call 6111 (Intercom) or inform to local fire brigade through Emergency Response Team and Inform GM Admin (Factory In charge).
- Make ready to use all Emergency equipment such as stretchers, breathing equipment, PPE, de-watering equipment, portable welding gas cutting equipment, spill kits, emergency lights, and battery-operated public-address equipment, ropes, lifting equipment, trolleys, emergency medical equipment, etc.
- Emergency transport vehicle shall be parked in open so that it is free from any falling objects.
- Identify critical and weak areas of site buildings and organize to support them adequately to prevent collapse.
- Check storage of Hazardous Chemicals to comply with normal storage safety requirements.
- Keep fire hydrant accessible, keep fire hoses and fire extinguishers readily available.
- Remove unwanted combustible materials.
- Review that room heater, electric hot plates and other sources of ignition that are normally used in winter situations are operated, handled and stored safely.
- Ensure that flammable liquids i.e. Petrol, Diesel and other petroleum products are stored within secondary containment with due precautions to prevent ignition.
- Over and above ensure that personnel are alert and do not panic.

- Ensure that raw materials and finished goods are not stacked over 6 feet height. This needs to be monitored at a regular basis as a emergency preparedness measure as well as standard health & safety practice;
- Conduct mock drills for preparedness to handle such situations;

6.4.4 Lightning

- Seek shelter immediately in a substantial building but stay away from corded telephones, electrical appliances, and plumbing.
- The second safest place is a vehicle with a metal roof and metal sides.
- If you are caught outside, stay away from open areas and water. Never stand under a tall, isolated tree.
- Lightning victims are safe to touch. If someone is unresponsive or not breathing, immediately call to medical center.

6.4.5 FIRE

- Evacuate the people from fire occurred surrounding area and send through safe exit direction.
- Remove unwanted combustible material.
- Keep cool and do not panic.
- Inform to substation and electrician to get the affected area isolated from power supply.
- Keep fire hydrant accessible.
- Keep fire hoses and fire extinguishers readily available.
- Ensure one operator is always present at hydrant system area when using the fire Hydrant system.
- If the fire is very small, use the correct fire extinguisher for extinguishing the fire.
- Try to isolate the fire by removing the surrounding inflammable material from within reach of fire.
- In case of big fire use local hydrant system for extinguishing the fire.

- If the fire is beyond the control inform the security or higher authority to call local fire Brigade (Bangladesh fire service and civil defense) and Inform GM Admin (Factory In-charge) or Emergency Response Team. (Please refer annexure 2 for Emergency Communications); On arrival of the fire brigade, ensure away for them reach the exact site of fire.
- In case of any accident in human life please call first aid team and get medical attention as quickly as possible;
- Conduct mock drills for preparedness to handle such situations;

6.4.6 Terrorist Attack and Bomb Threats

- Remain calm on receipt of such information via telephone. Do not get into any verbal altercation with the caller. Try to gather as much information as possible from the caller;
- Inform Sr.GM Admin/Senior Manager via intercom or mobile, have short meeting and discuss with emergency team and responsible person on all types of security aspect and decided individual role and inform security.
- Inform security in-charge and tell the all types of safety measure and then they will communicate the same to down the level security and for their role.
- Strengthen security in all entrance along with arms.
- Inform local police station and administrative officer immediately and take all types of help required. (Please refer annexure 2 for Emergency Communications);
- Inform top management through Emergency Response Team in order to obtain suggestions to combat such situations;
- Call on administrative office of neighboring factory like Pran Industrial Park-2. And request for help by providing additional security. Phone numbers are available in emergency contact diary.
- Inform local club and influential persons. Phone Nos are available in emergency diary.
- Prevent any associate from entering the factory.

6.4.7 Spillage of Hazardous Chemicals and Oils

Minor spill:

- Upon identification of any spill, barricade the area and restrict entry of workforce in that area;
- Spills must be cleaned up promptly and thoroughly by using appropriate (based on chemicals nature) spill kits. It is therefore necessary to keep adequate numbers of Spill kits and the workforce must be trained to use the spill kits in the event of minor spillage;
- Approach with care - many harmful chemicals lack color or offensive odors. Never assume that spilled chemicals are harmless.
- Identify the chemical/s and hazards involved – check Material Safety Data sheet (MSDS) or International Chemical Safety Card (ICSC).
- Use the information on the physical and chemical properties of the material to judge response and/or evacuation procedures.
- Decontaminate equipment, clothing and personnel, including any victims, on site if necessary.
- Dispose of contaminated equipment and materials only after receiving specialist advice and in a manner that complies with the law of the land;
- Conduct mock drills for preparedness to handle such situations;

Major Spill:

- Upon identification of any spill, barricade the area and restrict entry of workforce in that area;
- Contact the Emergency Response Team, Notify the control room operator.
- The control room operator will contact public authorities when appropriate seeking assistance for combating the emergency scenario.
- Evacuate personnel from the spill area.
- Do not touch any harmful substance. Take precautions to protect yourself if necessary.

- DO NOT go back in to an area where a chemical spill has occurred! Untrained rescuers who do not wear proper protective equipment can be overcome by toxic or asphyxiating fumes. Contact Operations manager and Lab Manager.
- Close doors to prevent further contamination. Secure the area to keep non-emergency response personnel away from danger.
- The Emergency Response Team will isolate contaminated individuals and treat as per MSDS. It is therefore necessary to keep the MSDS readily accessible at all times;
- In conjunction with expert assistance (such as chemist, supplier etc), the Emergency Response Team will minimize the spread of contamination and commence decontamination/clean up procedures. Ensure that all the members of Emergency Response Team are adequately trained in handling major spills;
- Conduct mock drills for preparedness to handle such situations;

6.4.8: Crush or collision

If any kind of crush or collision (e.g. due to vehicle movement at the site) happen at site immediately inform to factory first aider immediately, provide first aid treatment, assess the situation and inform ambulance (stationed at the site) and send the victim to medical center, if felt necessary.

7.0 Training

Monthly training will be imparted by site EHS Officer / Manager to the Senior Manager, Deputy Manager (QA), Security officer, Fire safety officer and GM and any other related workers/employees on:

- Emergency mock drills (theoretical and practical) considering various types of emergencies that the site may come across (such as Fire, Earthquake *etc.*);
- Emergency response plan;

- Conduct planned and un-announced emergency drills to observe response of the workforce;
- Applicable legal requirements related to Fire and Electric hazard control.

The annual training calendar will be updated to include the training on the emergency response plan and evacuation drill.

8.0 Monitoring and Review:

This procedure will be annually reviewed by EHS Officer / Manager along with Senior Manager, GM. In addition, he will also be involved in monitoring the following performance indicators to assess the effective implementation of the procedure:

- Evacuation drill records; and
- Training records.

Based on the inputs from EHS Officer/manager, the Senior Manager will be updating this procedure and will be sending to ED for approval.

9.0 Records & Reporting:

- Evacuation drill record;
- Training records;
- Emergency response team;
- Emergency contact number; and
- Evacuation plan.

10.0 Reference:

- Bangladesh Labor rules, 2015.
- IFC General Environmental, Health and Safety Guidelines.

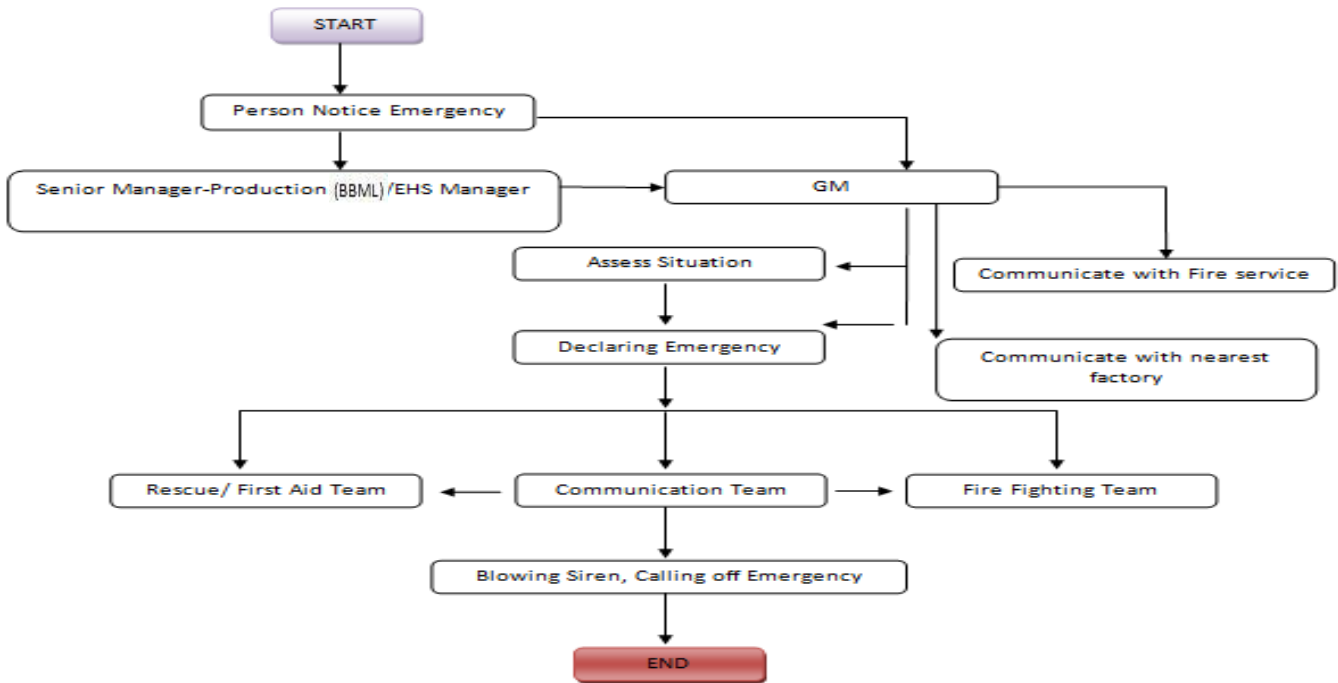

11.0 Approving Authority:

Executive Director is responsible for approving this Procedure.

Annexure-01: Emergency Response Categories

Tier	Emergency Description	Definition	Example
1	Minor	Any incident, potential or actual involving the process causing damage to assets or which will limit the overall functional capacity of the plant. Controlled by operations, Personnel and emergency response team.	Minor fire/explosion, Hydrocarbon leak/spill.
2	Serious	Any actual incident involving the process causing injury or serious injury to one or more personnel or death. Damage to the environment or serious damage affecting the overall functional capacity of the plant. Controlled by operations, Personnel, the EMT and supported by external agencies.	Serious fire/explosion, Hydrocarbon leak/spill.
3	Major	An escalated incident involving more than five seriously injured casualties or deaths. The effect pose a direct threat to local Civilian people or the environmental impact is extensive or the incident causes destruction of a part of the plant. Controlled by operations, Personnel, the EMT and supported by external agencies & government agencies.	Major Fire/explosion, Major hydrocarbon release, terrorist action and catastrophic failure.

Annexure-02: Emergency communication

BOMB FACTS

PRETEND DIFFICULTY HEARING - KEEP CALLER TALKING - IF CALLER SEEMS AGREEABLE TO FURTHER CONVERSATION, ASK QUESTIONS LIKE:

When will it go off? Certain Hour ____Time Remaining

Where is it located? Building _____ Area

What kind of bomb? _____

What kind of package? _____

How do you know so much about the bomb? ____

What is your name and address?

Call Security in Charge at _____ and relay information about call.

ভূমিকম্পের ক্ষয়ক্ষতি সম্পর্কে সচেতন হোন

সামাজিক ও পারিবারিকভাবে সচেতনতার মাধ্যমেই ভূমিকম্পের ক্ষয়ক্ষতি হ্রাস করা যেতে পারে।
তাই নিজে সচেতন হোন এবং অন্যকে সচেতন করুন।

ভূমিকম্পের আগে করণীয়

- ভূমিকম্পের ক্ষয়ক্ষতি সম্পর্কে পরিবারের সদস্য ও কর্মক্ষেত্রে সহকর্মীদের সচেতন করুন। ভূমিকম্পকালীন সময়ে কোথায় ও কিভাবে নিরাপদ স্থানে আশ্রয় নিতে হবে তা আগে থেকেই চিহ্নিত করে রাখুন।
- বাড়ীর গ্যাস ও বিদ্যুৎ এর মূল সংযোগ কোথায় অবস্থিত তা পরিবারের সদস্যদের জানিয়ে রাখুন এবং জরুরী অবস্থায় কে এবং কিভাবে সংযোগ বিচ্ছিন্ন করবেন তা আগেই ঠিক রাখুন।
- অগ্নি নির্বাপন, উদ্ধার এবং প্রাথমিক চিকিৎসা বিষয়ে আনুষ্ঠানিক ধারণা গ্রহণ করুন।
- শিশু-কিশোরদের ভূমিকম্পে করণীয় সম্পর্কে ধারণা দিন এবং বছরে একাধিকবার মহড়া দিন।
- শিক্ষা-প্রতিষ্ঠান, অফিস-আদালত, শিল্প-কারখানা, সুউচ্চ ভবন, মার্কেট ও অন্যান্য কর্মস্থলে দুর্ঘটনাকালীন সময়ে জরুরী নির্গমন পথ আগে থেকে প্রস্তুত এবং বড় আকারে লিখে রাখুন।
- ভবনের প্রতি তলায় অগ্নি নির্বাপক যন্ত্র উন্মুক্ত ও নিরাপদস্থানে সংরক্ষণ করুন এবং এর ব্যবহার পদ্ধতি সকলকে শিখিয়ে রাখুন।
- ভবনের ভেতরের ফুলন্ত বস্ত্র আলমারীগুলো শক্তভাবে দেয়ালের সাথে লাগাতে হবে, যাতে ভূমিকম্পের সময় শরীরের উপর না পড়ে।
- অফিস-আদালত, শিল্প-কারখানা ও সুউচ্চ ভবনে উদ্ধার সরঞ্জাম ও প্রাথমিক চিকিৎসা বাজ নিরাপদ স্থানে রাখুন এবং নিয়মিতভাবে রক্ষণাবেক্ষণ করুন।
- ইমারত নির্মাণে আইন সহ ভবন নির্মাণে “বিভিন্ন কোড” মেনে চলুন।

ভূমিকম্পের সময় করণীয়

- দরজার চৌকাঠের নীচে, শক্ত টেবিল, ডেস্ক, খাট বা বেঞ্চের নীচে আশ্রয় নিন।
- স্বীকে পড়ে মাথা বালিশ, কুশন বা হাত দিয়ে ঢেকে ফেলুন।
- লিফট বা এলিভেটর ব্যবহার করবেন না।
- ছাঁদ, বারান্দা বা জানালা নিয়ে লাফিয়ে নামার চেষ্টা করবেন না।
- ঝুলন্ত গ্যাসের চুলা নিভিয়ে ফেলুন এবং সম্ভব হলে গ্যাস ও বিদ্যুতের মূল সংযোগ দ্রুত বিচ্ছিন্ন করুন।
- বিদ্যুৎ ও টেলিফোনের খুঁটি, উচ্চ দেয়াল ও চলমান গাড়ি থেকে নিরাপদ দূরত্বে থাকুন।
- চলন্ত গাড়িতে থাকলে নিরাপদে খোলা জায়গায় গাড়ি থামিয়ে ভেতরে অবস্থান করুন।
- স্ট্রীজ, কালভার্ট, ফুট ওভার স্ট্রীজ, ফ্লাইওভার ও আভার পাস ব্যবহার থেকে বিরত থাকুন।
- অহেতুক স্বীকিপূর্ণ কোন কাজ করবেন না।
- আতঙ্কিত হয়ে চিৎকার বা ছুটাছুটি করবেন না। এতে বিপদের মাত্রা আরো বেড়ে যেতে পারে এবং শিশু-কিশোর ও বৃদ্ধগণ আতঙ্কিত হতে পারে।

ভূমিকম্পের পরে করণীয়

- খোলা ও নিরাপদে জায়গায় আশ্রয় নিন।
- বহুতল ভবনের বাইরের দেয়াল ও জানালা, বিদ্যুৎ ও টেলিফোনের খুঁটি, ইত্যাদি থেকে দূরে থাকুন।
- গ্যাস ও রাসায়নিক পদার্থের গন্ধ পেলে নিরাপদ দূরত্বে অবস্থান নিন এবং কর্তৃপক্ষকে অবহিত করুন।
- আহতদের প্রাথমিক চিকিৎসা দিন এবং প্রয়োজনে দ্রুত ও নিরাপদে হাসপাতালে স্থানান্তরের ব্যবস্থা নিন।
- ক্ষতিগ্রস্ত ভবনে আটকে পড়া মানুষ জনকে উদ্ধার কাজে কর্তৃপক্ষকে সহায়তা করুন। স্থানীয় খেজ্ঞাসেবকদের সহায়তায় গলি ও প্রধান সড়ক পথ থেকে ধ্বংসপ্রাপ্ত অপসারণে অংশগ্রহণ করুন যাতে উদ্ধারকর্মী বাহিনী দ্রুত উদ্ধারকাজ শুরু করতে পারেন।
- মানসিকভাবে বিপর্যস্ত ও শিশুদের সান্তনা দেয়ার জন্য কাউকে সার্বক্ষণিকভাবে তাদের পাশে রাখুন।
- আইন-শৃংখলা নিয়ন্ত্রনে সর্বশ্রী কর্তৃপক্ষকে সহায়তা করুন।

INSTRUCTION SIGN- (ii)

বজ্রপাতের ক্ষেত্রে নিরাপত্তা টিপস

বাইরে

নিরাপত্তা স্থান

যেমন দিকেরে আশ্রয় নিতে হবে

কোন টি-বুলব বসতুলে সেখানে গিয়ে না

খোলা মাঠের বা মাঠেরে ঘেঁষে গিয়ে আশ্রয় নেওয়া উচিত নয়।
পান্ন থেকে কমপক্ষে ৪ মিটার দুরে থাকতে হবে।

মাঠ খরান সময় তাড়াতাড়ি ফিরে আসতে হবে।

জলপূর্ণ খোলা পুত্রে থাকতে হবে।

বৈদ্যুতিক শক : প্রাথমিক চিকিৎসা ও কৃত্রিম শ্বসন প্রক্রিয়া

Electric Shock : First Aid & Artificial Respiration Procedures

এই নিয়ম শুধুমাত্র জরুরী অবস্থায় প্রাথমিক চিকিৎসার জন্য, ইহা খুব বেশি কার্যকরী প্রশিক্ষণের বিকল্প ব্যবস্থা নহে।

⚡ আগে নিরাপত্তা নিশ্চিত করুন +

কেউ বৈদ্যুতিক শক প্রাপ্ত হলে বৈদ্যুতিক সংযোগটি বিচ্ছিন্ন করতে সুইচ বন্ধ করুন, প্লাগ খুলে ফেলুন অথবা টান মেরে তারের সংযোগ মুক্ত করুন। যদি তা সম্ভব না হয় তাহলে একটি শুকনো বিদ্যুৎ অপরিবাহী বস্তু যেমন- কাঠের পিঁড়ি বা প্লাস্টিকের মাদুরের উপর দাঁড়িয়ে বিদ্যুৎ অপরিবাহী হ্যান্ড গ্লোভস পরে শুকনো কাঠের লাঠি কিংবা প্লাস্টিক বস্তুর সহায়তায় শক প্রাপ্ত ব্যক্তিকে যত দ্রুত সম্ভব তুলে নিয়ে আসুন। শুকনো কাঠের লাঠি কিংবা প্লাস্টিক বস্তু কাছে না থাকলে আহত ব্যক্তিকে স্পর্শ না করে হাতের কাছের কোন শুকনো রশি দিয়ে তার হাত ও পা পেচিয়ে তাকে সরিয়ে নিয়ে আসুন।

ক) নিঃশ্বাসের রাস্তা

নিঃশ্বাস ছাড়ার জন্যঃ

- আপনার হাত আহতের কপালের উপরে রাখুন এবং আলতোভাবে মাথাকে নিচের দিকে ঝুঁকান।
- ২ আঙ্গুল দিয়ে খুঁতনি উঠু করে ধরুন।

খ) শ্বাস প্রশ্বাসের ত্রিফল

যান্ত্রিক শ্বাস-প্রশ্বাস অনুভব করার চেষ্টা করুন, যেন ১০ সেকেন্ডের মধ্যেই নিঃশ্বাস আসা যাওয়া করে।

- তুকের উঠা নামা লক্ষ্য করুন। আহতের মুখের এবং শ্বাস-প্রশ্বাস নেওয়ার শব্দ শুুনুন।
- আপনার গাল দিয়ে তার বাহু এবার অনুভব করুন।

যদি আহত ব্যক্তি যান্ত্রিকভাবে শ্বাস-প্রশ্বাস নেয়ঃ

- সম্পূর্ণ সুস্থ হওয়া পর্যন্ত পরিচর্যা রাখুন।
- তাকে সার্ভিক সহযোগিতা করুন।
- নিয়মিত শ্বাস-প্রশ্বাস নিচ্ছে কি না পরীক্ষা করুন।

যদি আহত ব্যক্তির শ্বাস-প্রশ্বাস নিয়মিত না হয়ঃ

- তাকে সার্ভিক সাহায্য করুন
- পূর্বের শ্বাস-প্রশ্বাস পুনরুদ্ধারের জন্য যে নিয়ম উল্লেখ করা আছে সে নিয়ম অনুযায়ী তুকের মাঝখানে চাপ দিন।

গ) শ্বাস প্রশ্বাস পুনরুদ্ধার

শ্বাস-প্রশ্বাস পুনরুদ্ধার ও তুকের চাপ সঞ্চালন করতেঃ

- আহতকে সোজা করে শোয়ান এবং আপনার বাহু সোজা করে তুকের মাঝখানে ৪/৫ বার চাপ দিন। এরপর চাপ দেওয়া বন্ধ করুন।
- পুনরায় মিনিটে ১০০ বার হারে চাপ দিন।
- ৩০ বার চাপ দেওয়ার পরে আবার নিঃশ্বাস ছাড়ুন।
- আহতের মাক চেপে ধরুন এবং মুখ খুলে দিন।

- আপনি যান্ত্রিকভাবে শ্বাস-প্রশ্বাস দিন এবং আপনার মুখ আহতের মুখের সঙ্গে লাগান, উত্তর মুখ ভাল করে লাগান।
- মুখের মধ্য দিয়ে সঠিকভাবে শ্বাস এগান করুন এবং লক্ষ্য করুন তার তুকে উঠু হচ্ছে কি না।
- আপনার মুখ সরিয়ে দিন এবং লক্ষ্য করুন তার তুকে উঠু হচ্ছে কি না।
- ১ সেকেন্ডে নিঃশ্বাস ছাড়ার সুযোগ নিয়ে সঙ্গে সঙ্গেই আবার ৩০ বার চাপ দিন।

- যদিও ডাক্তারের সাহায্য না পাওয়া পর্যন্ত এভাবে নিয়মিত চাপতে থাকুন, যতক্ষণ পর্যন্ত রোগী ৩০-২ হারে নিঃশ্বাস না নেয়।
